Case Study: Finleys Grill Room

Location: Downers Grove, IL

Description: This unique shade pendant is custom-manufactured from an architectural vinyl film printed with wood grain. It is stain and abrasion resistant—perfect for restaurant use. The shades pictured at Finleys can be found in their dining room, and are 36 x 12 inches.

About the Vinyl Film

The vinyl film is a thin, flexible PVC with a protective top layer. It simulates a variety of natural and synthetic finishes including wood, granite, marble, stucco and just about anything else. It can be manufactured into virtually any shade pendant. The possibilities are endless! Water does not penetrate the film, so it can be easily cleaned with commercially available synthetic detergents and a soft cloth or sponge.
