

Case Study

Rockefeller Chapel
University of Chicago
Chicago, IL

Case Study: Rockefeller Chapel
University of Chicago

Location: Chicago, IL

Description: Restoration and upgrade of all historic light fixtures for the entire chapel, including nave, chancel, transepts, narthex, and ambulatory. Project scope included finish restoration, electrical upgrade and retrofit, and replacement of leaded bent glass panels. In addition, duplication of missing original fixtures was required as a component of the project.
